The Eye Refract system was dual, Shack-Hartmann wavefront aberrometers, combined with a fully automated digital phoropter, to deliver highly accurate and reproducible refractions in less than 4 minutes. The tablet-driven process can be conducted by a staff member with limited training while still delivering consistent results.

Valid and reproducible results

Results first published in the ARVO Journal (August 2018) demonstrated Eye Refract strongly correlates with traditional refraction, showing no statistical differences between the two methodologies. Finally, Eye Refract delivered results faster as compared to conventional subjective refraction.

Eye Refract identifies the patient’s comfort zone by searching in 3 dimensions: Sphere, Cylinder, and Axis.

The 2018 Madrid Study demonstrates Eye Refract facilitates an accurate and reproducible refraction process that is completely independent of the operator.

| Output | • VX25-ER (ERG) + VX40-ERG • Embedded Bluetooth - VUX
| Hardware | Tablet: Android
| | Chinrest: Electrical
| | Near Vision Target: 250-700 mm
| | Mini tablet 7"
| | Head: Autofocus, autocentering
| Range | Sph: -30.00 to +27.25 D
| | Cyl: 0 to +6.00 D
| | Cyl step: 0.25 / 0.50 / 1 D
| | Optical axis: 0° to 90°
| | Sph step: 0.125 / 0.25 / 0.50 / 1 D
| | Axis step: 1° / 5° / 10° / 45°
| | Prisms: 0 to 20 D
| Communication | • RS232 / USB2.0 / LAN

SMALL FOOTPRINT  
BIG IMPACT

**NEW REFRACTION STATION**

Eye Refract combined with the new VX25 Acuity Chart delivers accurate and reproducible refraction results on an instrument table that’s only 43 inches long.

**VISIONIX TABLET**

Advanced software embedded in our wireless Eye Refract tablet guides any staff member through the 4-minute refraction. Final prescription data is sent to the Eye Care Professional for confirmation and sign-off.

**FULLY AUTOMATED, WAVEFRONT-BASED LENS ANALYZER**

Reads the patient’s current prescription and transfers data wirelessly to the Eye Refract station.

**NEW VX25 SPACE SAVING CHART**

Designed for binocular vision testing, visual acuity and diagnostics, the VX25 space saving chart uses internal mirrors to deliver accurate results in just 2.5 feet. The VX25 has a matte, anti-reflective screen, and a wide selection of acuity charts.

Delegating refractions with Eye Refract means new prescription information will arrive at your Exam Room PC, before your patient.

WHAT WILL YOU DO WHEN YOU REMOVE THE REFRACTION PROCESS FROM YOUR CONSULT TIME?

WHEN YOU NO LONGER REFRACT EVERY PATIENT...
Eye Refract lets you delegate refractions with confidence.

The Eye Refract system uses dual, Shack-Hartmann wavefront aberrometers, combined with a fully automated digital phoropter, to deliver highly accurate and reproducible refractions in less than 4 minutes. The tablet-driven process can be conducted by a staff member with limited training while still delivering consistent results.

Valid and reproducible results

Results first published in the ARVO Journal (August 2018) demonstrated Eye Refract strongly correlates with traditional refraction, showing no statistical difference between the two methodologies. Finally, Eye Refract delivered results faster as compared to conventional subjective refraction.
